The Legend of the **DOGWOOD**

There is a legend, that at the time of the Crucifixion the dogwood had been the size of the oak and other forest trees. So firm and strong was the tree that it was chosen as the timber for the cross. To be used thus for such a cruel purpose greatly distressed the tree, and Jesus, nailed upon it, sensed this, and in His gentle pity for all sorrow and suffering said to it:

"Because of your regret and pity for My suffering, never again shall the dogwood tree grow large enough to be used as a cross. Henceforth it shall be slender and bent and twisted and its blossoms shall be in the form of a cross . . . two long and two short petals. And in the center of the outer edge of each petal there will be nail prints, brown with rust and stained with red, and in the center of the flower will be a crown of thorns, and all who see it will remember . . . that it was upon a dogwood tree I was crucified and this tree shall not be mutilated or destroyed, but cherished as a reminder of My death upon the cross."

MALUS

Flowering Crabapple

Flowering Crabs have few rivals among the Spring flowering trees. They have a wide range of color, are hardy and thrive in almost any soil. Many varieties bear ornamental fruit, which adds to their Fall beauty.

**Block of Flowering Crabapple

DOGWOOD

Planting Instructions

Do Not Bury! Plant Shallow.

Never plant a dogwood deeper than it stood in the nursery row.

1. If barerooted, dig hole large enough to accommodate roots without crowding and deep enough to set tree same depth it grew in nursery row. Bruised or broken roots, or stems, should be cut off clean.
2. Fill hole half full of good rich soil, using no fertilizer. Spread the roots and cover with loose top soil, working soil well underneath to prevent leaving air spaces.
3. Finish filling hole and tamp soil firmly. Water well.
4. If B&B, dig a hole a foot larger and 6 inches deeper than ball of earth. Set tree same depth it grew in the nursery row, using top soil for back fill. Tamp soil firmly. Water well.
5. Mulch with 2 inches of barnyard manure, peat moss, leafmold or well rotted sawdust.
6. Wrap trunk with paper or burlap from ground to lower limbs to prevent sun scald.
7. Water thoroughly once a week. Do Not sprinkle—SOAK!
